#### **Filter boxes**

### Models

- Filter boxes for max. 52 communication line filters with 1 pair or 2 lines
- Filter boxes for max. 12 communication line filters with 10 pair or 20 lines

### Features

The box is suitable for a mixed complement. A cable that simultaneously carries switching signals, communication signals and DC power, for example, can be split to separate filters for optimum signal transmission plus high stopband attenuation.

Only one RF-tight connection is needed on the shielding wall. The split cables are protected by the box.

### Overview

Model	Slots	Number of pairs / lines	Ordering code	Page
1 pair or 2 lines	26	26 / 52	B84299G0126A	110
	52	52 / 104	B84299G0152A	111
10 pairs or 20 lines	6	60 / 120	B84299G0114A	114
	12	120 / 240	B84299G0114B	115

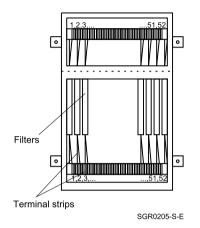

#### **Filter boxes**

### B84299G

Filter boxes for communication line filters with 1 pair or 2 lines

### Design

- Material: 1.5 mm sheet steel
- RF-tight, welded-in shielding wall of high-grade steel
- Both parts of filter box accessible through separate lids

The shielding wall has 26 or 52 holes for screwing in the filters. Unused holes are sealed off by RF-tight screw plugs, which can be removed for later filter additions.

On each side of the box there are terminal strips for attaching the filter lines, and 3 cable inlets with the thread size of PG 29. Matching cable glands can be screwed in here using reducer rings if necessary.

Ex works the filter box comes with 2 glands of size PG 29 for cable diameters of 23 to 28 mm. At the front end the filter box can be connected to the shielding wall with maximally 3 connector fittings with nominal width of 25 mm.

Other cable inlets are available upon request.

Filters for communication lines

#### **Filter boxes**

The shielding wall has 6 or 12 rectangular cutouts for screwing in the filters. Unused cutouts are sealed off by RF-tight dummy panels, which can be removed for later filter additions.

On each side of the box there are terminal strips for attaching the filter lines, and 4 cable inlets with the thread size of PG 29. Matching cable glands can be screwed in here using reducer rings if necessary.

Ex works the filter box comes with 4 glands of size PG 29, PG 29/PG 21 reducer rings and PG 21 cable glands.

On the rear the filter box can be connected direct and RF-tight to the shielding wall.

The following applies to all products named in this publication:

- 1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule we are either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether a product with the properties described in the product specification is suitable for use in a particular customer application.
- 2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
- 3. The warnings, cautions and product-specific notes must be observed.
- 4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous). Useful information on this will be found in our Material Data Sheets on the Internet (www.tdk-electronics.tdk.com/material). Should you have any more detailed questions, please contact our sales offices.
- 5. We constantly strive to improve our products. Consequently, the products described in this publication may change from time to time. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order.

We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.

- 6. Unless otherwise agreed in individual contracts, all orders are subject to our General Terms and Conditions of Supply.
- 7. Our manufacturing sites serving the automotive business apply the IATF 16949 standard. The IATF certifications confirm our compliance with requirements regarding the quality management system in the automotive industry. Referring to customer requirements and customer specific requirements ("CSR") TDK always has and will continue to have the policy of respecting individual agreements. Even if IATF 16949 may appear to support the acceptance of unilateral requirements, we hereby like to emphasize that only requirements mutually agreed upon can and will be implemented in our Quality Management System. For clarification purposes we like to point out that obligations from IATF 16949 shall only become legally binding if individually agreed upon.
- 8. The trade names EPCOS, CeraCharge, CeraDiode, CeraLink, CeraPad, CeraPlas, CSMP, CTVS, DeltaCap, DigiSiMic, ExoCore, FilterCap, FormFit, LeaXield, MiniBlue, MiniCell, MKD, MKK, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, PowerHap, PQSine, PQvar, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, ThermoFuse, WindCap are trademarks registered or pending in Europe and in other countries. Further information will be found on the Internet at www.tdk-electronics.tdk.com/trademarks.
